

# Chasing my Y-DNA part 45

## The Approach to Figuring of my Y-DNA Line, by Intertwining Genealogical Principals.

One thing, I do realize along with the Y-DNA also though ladies may not want to admit is the Y-Chromosomes, and cultural behavior is taught by the father to the son, though the father may not always carry the same Y-DNA.

There still today in Anglo-European society different things bestowed on the oldest son than the youngest son. In the Modal group there is a Robert P. Elliott, though my brother Robert L. Elliott and I were closer, because we grew up together in the same family and shared the same mother, in a genetic analysis, since Robert P. Elliott and I have similar interest and from my understanding we both cross-country ski, and live in the west had red heads in the family, **we are like step-brothers** of the same father, but raised with separate mothers. Culturally, it may be said living in Gallup, New Mexico for over the last quarter century, I have been living outside mainstream America.

Robert P. Elliott, showed a photo of someone who carried George Washington's Y-DNA looks like him. From a stand point of genealogical research it seems that I could not find paintings, but characteristics which seem to link family.

KE (Keith Elliot) Hunter, as me one time or mention the committee or group, in some sort of fashion and I had to say they were family. In genealogical research, it is not important to be correct, and many times wish my analysis would not go the way its does, but what is being found though family does not always agree, I am finding family, though Robert P. Elliott had lead me to KE Hunter, from my research, I am sure that he is family, and he is my eyes in today's Scotland.

The most important aspect of genealogical research is **finding family, and not the ones which are deceased.**

Dad says, it is not the winning at bridge which is important by the people you meet. The Navajo use black wool in the making of their rugs. Black wool can not be died, and therefore sometimes I feel like a da-be' (sheep) which returns such wool.

Since my family went the way of the Armstrongs, and according to dad in Mt Ayr there were always Armstrongs around, and dad's brother Jack (was going to be named John, but Jack is derived from John on the border), married a Dixon.

No, Armstrong! I was having problems. The research when Robert Elwald received land of Redheugh, there were Elwald, Gledstanis, Kerr, Crosar, Forest, Graham, and Scott, but no Armstrong. Needed an Armstrong, knowing the Armstrongs, they did not need me. Use to being in a region, to get Native American input you have to go after them to get them involved, but you never know what to expect. One has to expect ideas coming from an Armstrong which you do not share, but in this case will build to a knowledge base. Keith told me that the Elliott Clan in Scotland had to pledge loyalty to the Scott Clan, and my family to me went the way of the Armstrongs.

Keith Hunter, informed me that he was linked into Cavers, the Elliot and the Crosier, and doing research, found that Clementis Hob (Clement Crosier's adopted Robert Elwald/Ellot) where he is the nephew of Cement Crosier, first known owner of the Stobbs estate. Clement Crosier before the family feuds with Kerr and Scott took in Hunters which were resettled from the Tyndale region of England just the other side of the border about 1540, to the region of Hunterhill, near the Rutherfords and Kerrs, and the Douglas of Cavers. The Hunter coming into Scotland as far as the Kerrs, Crosier, and Elliot at the time were concerned had a great resume.

As far as Lowell C. Armstrong, it is felt he was the first to recognize family, as cousins, plus along with Robert's Y-DNA analysis. The Elliott, are somewhere between the Armstrong and the Scott, where the English Elliott may have leanings towards the Scott Clan, the American Elliott would most likely have leanings towards the Armstrong Clan.

Though I told Dee Elliott-Wakefield, though I had to inform, her that, I was to do genealogy through a holocaust. In other words to do genealogy through, a border change 1320, Reformation 1540, Union of the Crowns (holocaust) 1600, and The English Civil War 1650, can not expect people to accept my analysis but may be family can.

People should take note that the most educated people of their day, concluded the concept Daniel Elliot brought forth using multiple references that the girls accused people of being witches "out of sport". It was not the girls that were finding guilt, but the most educated, and political people of their day where utilizing a sort of McCarthyism, which was use to accused when I was a child.

It should be noted though still working on the genealogy, that over three years ago, it is felt I mention something to Robert P. that I could not come to any conclusions, without in ways running concurrent comparisons.

# Uniformitarianism

Will be using uniformitarianism as the process to analyze the family genealogy.

en.wikipedia.org/wiki/Uniformitarianism

**Uniformitarianism** is the assumption that the same natural laws and processes that operate in the universe now, have always operated in the universe in the past and [apply](#) everywhere in the universe. It has included the [gradualistic](#) concept that "the present is the key to the past" and is functioning at the same rates. Uniformitarianism has been a key principle of geology and virtually all fields of science, but naturalism's modern geologists, while accepting that geology has occurred across deep time, no longer hold to a strict gradualism.

Uniformitarianism was formulated by Scottish [naturalists](#) in the late 18th century, starting with the work of the [geologist James Hutton](#), which was refined by [John Playfair](#) and popularised by [Charles Lyell's Principles of Geology](#) in 1830.<sup>[1]</sup> The term *uniformitarianism* was coined by [William Whewell](#), who also coined the term [catastrophism](#) for the idea that Earth was shaped by a series of sudden, short-lived, violent events.<sup>[2]</sup>

Key topics on  
**Geology**

Grand Canyon

Appropriately, it is a process which comes out of **Scotland**, basically that what is happen today has happened in the past.

Those characteristics which I find in myself, will find in those which carry, my Y-DNA today and in the past.

So in that case need to reference myself;

← → ↻ 🏠 [www.familyorigins.com/users/e/I/I/Steven-R-Elliott/FAMO1-0001/d46.htm#P5425](http://www.familyorigins.com/users/e/I/I/Steven-R-Elliott/FAMO1-0001/d46.htm#P5425)

**Mark Stephen ELLIOTT** was born on 22 Oct 1949 in Jefferson, Greene, Iowa. He has reference number U04780370. !SOURCE U0478 !PROV !Graduated from Roosevelt High in Des Moines, IA, in 1968. Received a letter in wrestling his senior year. Graduated from Univ. of Wyoming with BS in History & Economics in 1972. Graduated from Univ. of Utah with BSS in Mining Engineering in 1978. Hobbies has been Mt. Climbing & now backpacking & cross-country skiing. Employed by National Gypsum in Shoals, IN, 1979-83. Attending Indiana Univ. at Bloomington, IN in 1984. Parents: [Loren Spencer ELLIOTT](#) and [Alma Anne BARNA](#).

He was married to [Mary Lou WATSON](#) on 28 Feb 1978 in Salt Lake City, Utah. He was divorced from Mary Lou WATSON.

He was married to [Susan Roberta WARREN](#) on 27 Jun 1987 in Gallup, New Mexico.

In the past such information about oneself could not be made available. **The above gives reason not to utilize your mother's maiden name as a security question.** To correct things do not have as degree in History. Had a graduate assistant ship through the mathematics department at Indiana University, but did not complete the masters.

The above was likely transcribed/copied by research done by my father.

It should be noted that the correction which was made concerning the Lambert family seem to been quite insidious, could not figure out where it came from. Dad, brought attention to the book at the Genealogical Library, in Mesa, Arizona where he lives. Going to Salem taking a digital photo of the 1688 record, and having knowledge that not all transcriptions came up with Elliot on the record. On may note the transcription which

contained Elliot was done by and expert by the Essex institute, and high quality genealogist researching the Daniel group brought it to my attention. It was difficult for me to come to the conclusion that it was an Elliot record corrected to a Lambert record, though would liked to believe otherwise. If an error is made in genealogical research it compiles on itself. Hopefully at some future date other relatives of Daniel of the testimony will be found.

Went to work;

ing with the New Mexico Coalition to Repeal the Death Penalty on legislative measures. The Catholic bishops in New Mexico are a part of a public education program on the death penalty.

**Mark Elliott**

In the West, Wyoming, Utah, Idaho and Colorado were the first states to give women the right to vote. Susan B. Anthony, a member of the Religious Society of Friends, was at the forefront of the early women's rights movement. New generations of Friends are now working in many states such as New Mexico to repeal the death penalty. Though New Mexico was not at the forefront of women's rights, the opportunity is here for New Mexico to be one of the first western states to repeal the death penalty.

*Mark Elliott is a math instructor at Gallup High School and UNM-Gallup.*

As a math instructor at the University and secondary level, also instructed engineering computing. One of my students was a son of a friend.

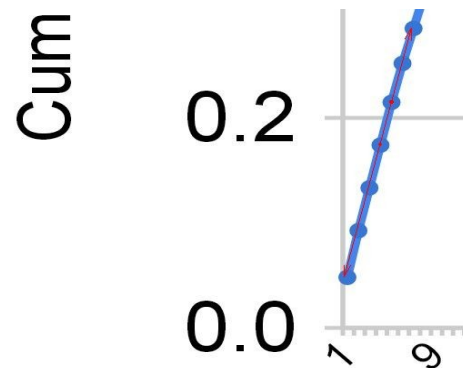

**Ronnie Misra, 33**  
Sunnyvale, CA

Gender	Male
Places Lived	Campbell, CA, Sunnyvale, CA,
High School	<a href="#">Gallup High School</a> — Class of 1994
Work	<ul style="list-style-type: none"><li>• Apple Inc., Software Engineer</li><li>• Ibm, Software Engineer</li></ul>

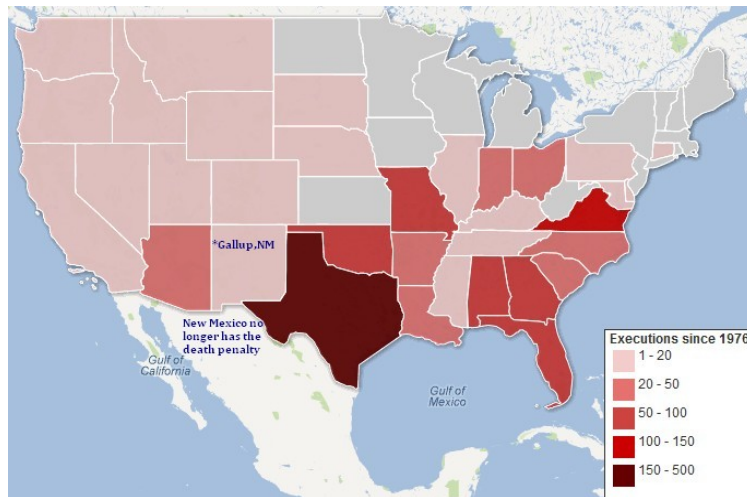

**About Ronnie Misra**

Ronnie Misra was born in 1979. Ronnie currently lives in Sunnyvale, California. Before that, he lived in Campbell, CA from 2000 to 2004. Before that, he lived in Sunnyvale, CA from 2004 to 2009. Ronnie Misra attended Gallup High School in Gallup, NM and graduated class of 1994.

Taught engineering computing; FORTRAN, at University of New Mexico in Gallup and he said it is incorporated in today's software. When asked he said he was the youngest student at his school (MIT).

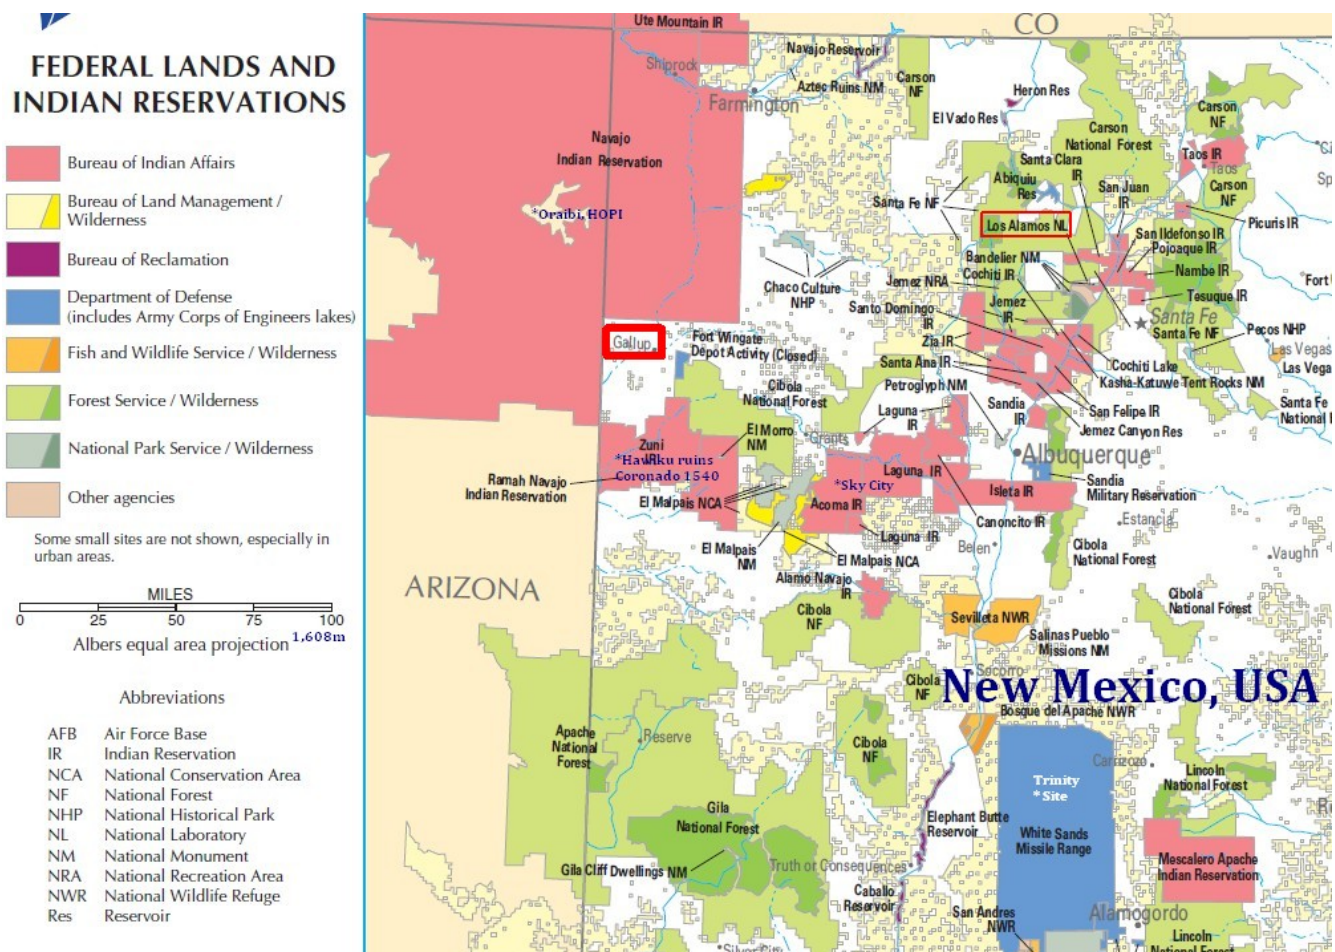

With a program Robert P. provided a link to, it looks as though FORTRAN may have been used. Felt is was kind of ingenious, but utilizing a command of drawing straight lines between the points to speed up the graphing of the program.

May be people can have an impact. New Mexico and afterward Illinois, no longer have the death penalty. As one can see where Gallup is.

Gallup, is between the two oldest continuing inhabited communities in today's United States, that of Oriabi, Hopi, Arizona, and Sky City, Acoma, New Mexico, USA (the only license plate with USA on it). These communities are pre-Columbian, but know record which is first. Coronado came to a community of Hawikuh in 1540 which is in ruins. Though the foremost United Kingdom physicist from New Zealand did not feel a chain reaction would work. A backyard New Mexican astronomer discovered Pluto. In California, they made a man made element and called it Plutonium, with help from scientist of Los Alamos (the trees), New Mexico, a chain reaction took place at the Trinity Site, which could be seen from Gallup, vaporized the tower but left foundation.

Reservation is land that is own by the federal government place in reserved, and therefore not for sale. The Navajo Nation is a land area more than half the size of England and about the size of the State of West Virginia. Back to Uniformitarianism again.

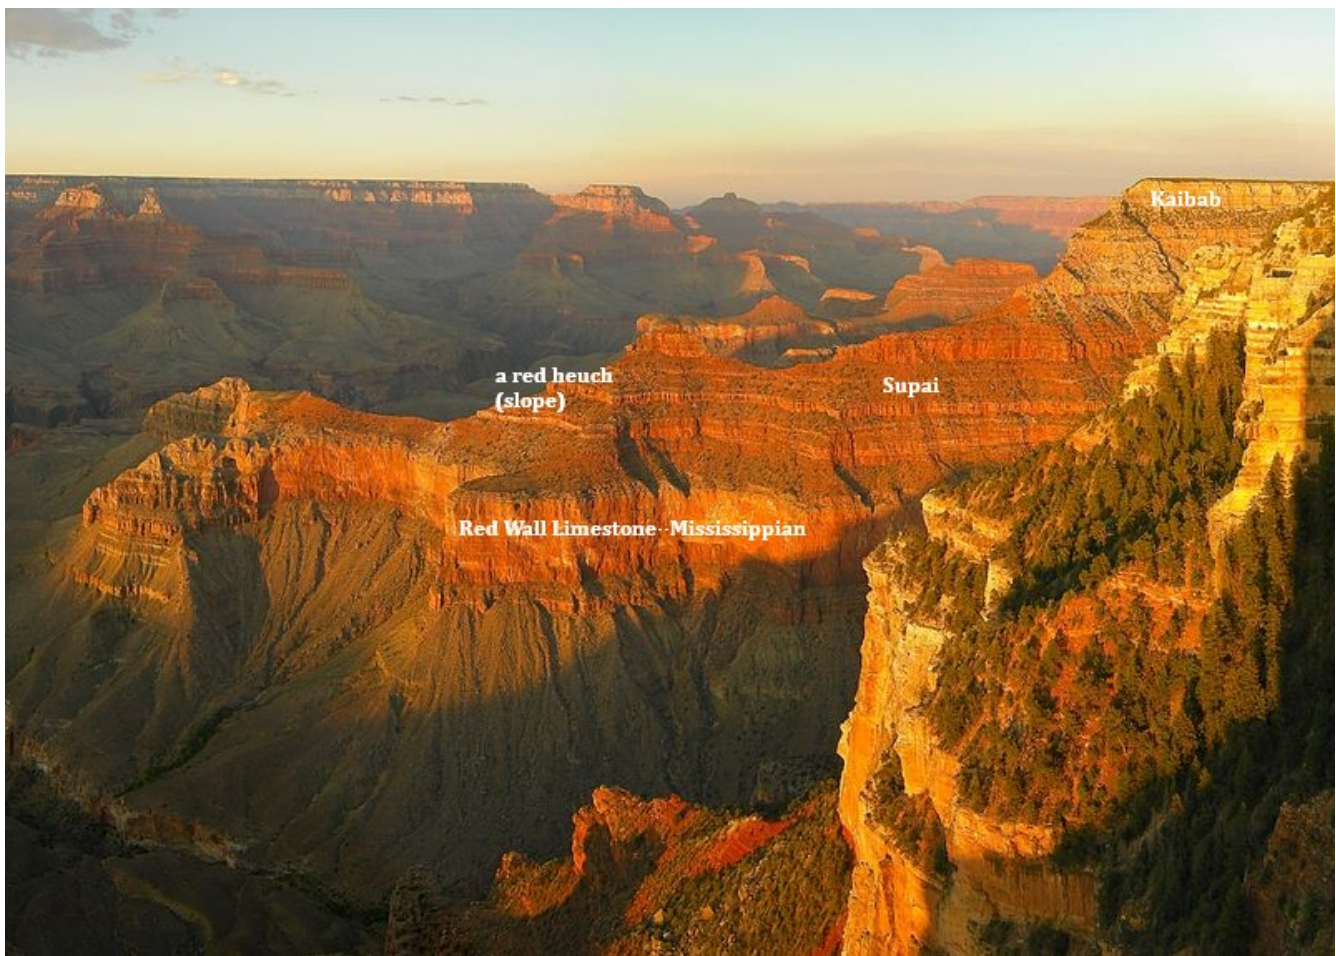

**Uniformitarianism** is the assumption that the same natural laws and processes that operate in the [universe](#) now, have always operated in the universe in the past and [apply](#) everywhere in the universe. It has included the [gradualistic](#) concept that "the present is the key to the past" and is functioning at the same rates. Uniformitarianism has been a key principle of geology and virtually all fields of science, but naturalism's modern geologists, while accepting that geology has occurred across deep time, no longer hold to a strict gradualism.

Uniformitarianism was formulated by Scottish [naturalists](#) in the late 18th century, starting with the work of the [geologist](#) James Hutton, which was refined by John Playfair and popularised by Charles Lyell's *Principles of Geology* in 1830.<sup>[1]</sup> The term *uniformitarianism* was coined by William Whewell, who also coined the term *catastrophism* for the idea that Earth was shaped by a series of sudden, short-lived, violent events.<sup>[2]</sup>

#### Key topics on Geology

Grand Canyon

A lot of people all over the world go to see the Grand Canyon, fairly near to where I live. The iron oxides, coming out of the inter bedded pores sandstone within the Supai formation paints the light gray vertical limestone red of the Red Wall Limestone formation of the Mississippian era.

Worked between Mississippian limestone when I worked for National Gypsum as a mine engineer.

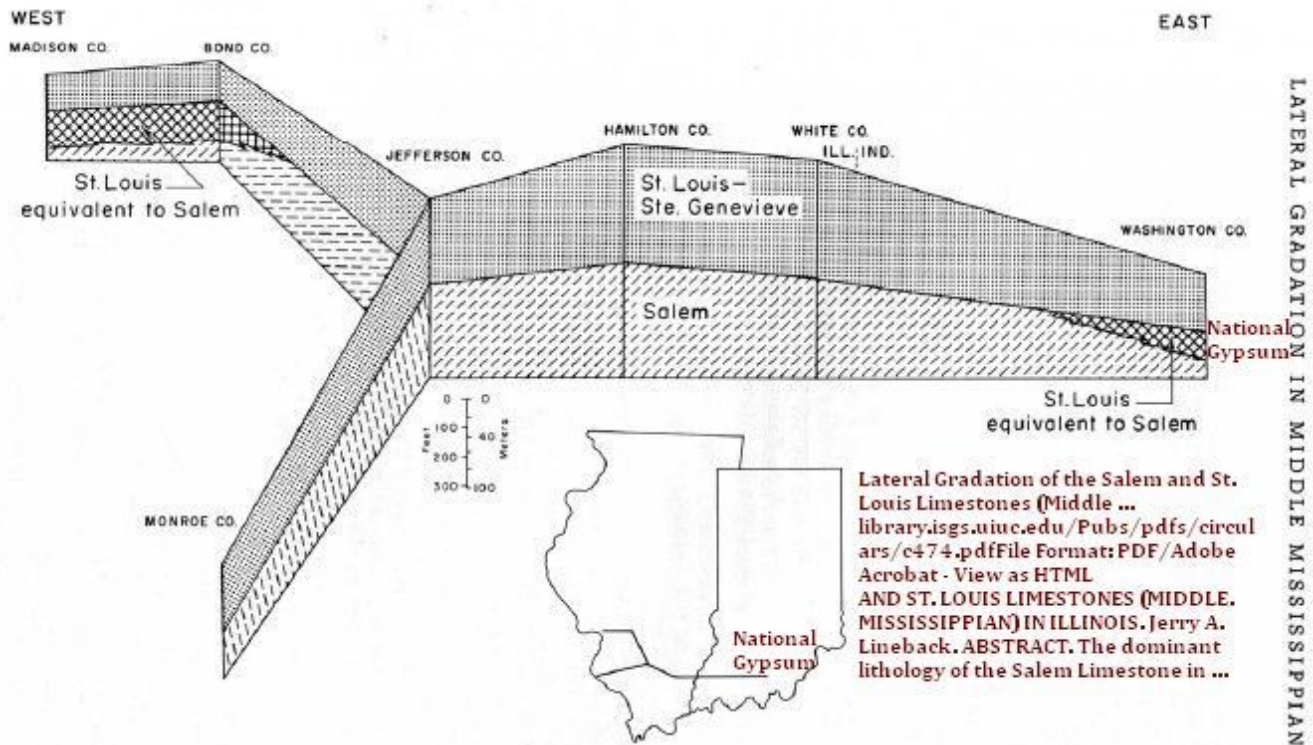

Fig. 11 - Diagrammatic cross section across the Illinois Basin showing the stratigraphic relationship between the Salem and St. Louis Limestones.

## 20 ILLINOIS STATE GEOLOGICAL SURVEY CIRCULAR 474

equivalent to the subsurface fine-grained facies, which grades southward into the Salem biocalcarenite. The fine-grained facies in the Madison County subsurface contains beds of gypsum that are absent from the outcrop. The outcrop

Work in Martin County, next to Washington County, near Shoals, Indiana under highway US 50. Surveyed and mapped on the surface, in the mine and *in situ*; in between the surface and mine. Dad graduated as an agricultural engineer from Iowa State College (now University), and worked for the Soil Conservation Service, Department of Agricultural as a Watershed Planning Engineer (Civil) for the State of Iowa, and he surveyed also. Salem, limestone was quarried just south of Bloomington, Indiana to build the empire state building in New York City. It is felt that quarrying the stone form the Hermitage Castle would still today have an impact on the landscape and the limestone (noted in a photo it was gray an angulated fracture with

conchoidal similarity, giving it aspects of limestone).

Also with uniformity will have a tendency to utilize mathematical modelling.

[en.wikipedia.org/wiki/Mathematical\\_model](http://en.wikipedia.org/wiki/Mathematical_model)

A **mathematical model** is a description of a system using mathematical concepts and language. The process of developing a mathematical model is termed **mathematical modelling**. Mathematical models are used not only in the natural sciences (such as physics, biology, earth science, meteorology) and engineering disciplines (e.g. computer science, artificial intelligence), but also in the social sciences (such as economics, psychology, sociology and political science); physicists, engineers, statisticians, operations research analysts and economists use mathematical models most extensively. A model may help to explain a system and to study the effects of different components, and to make predictions about behaviour.

Mathematical models can take many forms, including but not limited to dynamical systems, statistical models, differential equations, or game theoretic models. These and other types of models can overlap, with a given model involving a variety of abstract structures. In general, mathematical models may include logical models, as far as logic is taken as a part of mathematics. In many cases, the quality of a scientific field depends on how well the mathematical models developed on the theoretical side agree with results of repeatable experiments. Lack of agreement between theoretical mathematical models and experimental measurements often leads to important advances as better theories are developed.

One of the models which people likely will not understand, that in today's mathematics, people of not so high of mathematical intellect will utilize formulas, which even I can somewhat begin to understand, and in given time but do not like to apply myself in such manner can.

An example of this is when I went to court up against what a friend called an infallible photo radar, the prosecutor for The State of Arizona when asked said his undergraduate was in English literature, presented complex math which would confuse the average defender, but studying the frequently asked question, and the principal of accuracy and not able to get a defense lawyer interested in my case, felt that the prosecuting lawyer would do find, and I did not have to pay him.

So he put forth many numbers, and concluded I was going 11 mph or more over the speed limit the speed need for photo radar, and I used his numbers 56 speed - 1 accuracy - 45 posted = 10 and was not greater than 11. Many a false ticket has been mailed. Using uniformity, many a witch in Salem have been falsely accused by educated idealism.

Those who worked as mathematicians, engineers, accountants, and scientists in the applied sense are less likely as compared to those as in other fields such as English literature are less likely to bias the numbers, and will utilized numerical analysis to problem solve.

It has been found that a lot of people which do not have the numerical background may plug in numbers but bias there output, where it is felt the persecutor for the State of Arizona in the above example. Of course with the concept that there are Salem Witches and that Photo Radar is Infallible, and the Galileo after doing his calculation is incorrect and the authority The Church of Rome that the Earth is the Center of the Solar system, my numerical way **has to be incorrect** to the historians, religious leaders and everyone else, but since I am searching for self it is important that I get is right for myself. One thing which it is felt to be correct if I error, family will error in the same direction therefore in that manner family can be recognized.

It is figure that there is a likelihood that my Y-DNA relatives some may have a

knowledge of **mathematics, and surveying**. The older brother would also have characteristics placed on an older brother.

It should be noted that Robert P. Elliott, shows a knowledge of being able to utilize formulas and charts, and shares my Y-DNA, but if he does not have a large history of applied mathematical and mapping use age his numbers may be bias. It is difficult to challenge the numbers of someone who has a large experience of numerical usage. Robert should note it took me years to begin to come to some conclusions. One thing I have problems to deal with is “dotting the *i*”, and other people have been a great help in that area.

When one does genealogy through a holocaust, the nation in which the holocaust takes place becomes in denial and in every way resist that which is true.

Basically before The Union of the Crowns. There was a self govern nation of border reiver between Scotland and England, and this Nation of Borders, is what made the border. A policy of moving or being exterminated was placed on those of the border. This effected border clans as the Elliot, Armstrong, and Graham. The Scott Clan the largest land holder in Scotland, did not have to go, nor did the Elliot which gave loyalty to the Scott Clan which gave loyalty to the king, did not have to go also.

The denial can be seen in the symbolization of Braidley being place on the, map drawn by J.A. Young, of the **Borders Regional Council**, of placing the home of the so called by the Scott Clan the notorious border reiver Martin Elliot/Elwood as being of Braidley being near the Scott estate of Branxholm, instead of just east of the Hermitage Castle between Goranberry and the Hermitage, where archeological evidence, and a series of maps shows it to be.

Let the misplacement of Braidley on map, drawn by J.A. Young, of **Borders Regional Council**, stay where it is misplaced being symbolic in its misplacement shows the denial of the holocaust bestowed on the self governing Border Nation which was once during a period between 1320-1605, between England and Scotland, and let the **Elliot Clan Society** keep this map on its sight to symbolize denial of this holocaust also.

Hopefully the concept of correlating surnames with geography will help future researchers decide, the beginnings of surnames which are not geographically located.
