

Abirlot an arbor-lot, Elliot an el-lot;

Above is an early map where one sees Arbirlot (arboretum), and Elliot. Before 1600 Scotland measure land in ell, and lots had a perimeter.

Map above shows orchard at Arbirlot, and lot with perimeter which in 1750 would be referred to as acre-lot, and in above map land are measured in ell

would be referred to as el-lot. When land was measured in acre the el-lot became archaic, an "i" was inserted, to make a know name of Elliot.
