Migration and Clan Relations

Migration;   *Elgwald to Elfwald to Elwald to Ellot*
Clan Relations;   *Redheugh, Larriston, Stobs and Horseliehill*

I am from the **Elwaldus** (Latin; -us) family line of Angles of
Schleswig; Northern Germany Denmark. In Denmark we were
known as; **Ælgwald** meaning **Elg** (Brit **Elk,** Am. **Moose**) of the
forest (Brit; **wood,** Am; **woods**). This is where we find **König
Ælgwald** (King Ælfwald). In Northumbria, Yorkshire, the name
Elgwald/Algwald, became **Elfwald,** in which it became **Elf** of the
forest. **Elfwald** had a son **Alanus Elfwald,** who had a son **Alan
Elwald** who had a son of Rimington, Lancashire **Robert Elwald**,
the first chief of the **Robert Elwald** line.

extending to the rill of Trillesden which acre Elwaldus de
Schinktlef formerly held. To have to William and heirs or
assigns, freely [etc.]. Warrant clause. Witnesses : Domino
Willo. de Latone, Domino Willo. Harpyn, militibus; Thoma
de Kellawe, Nicholao et Henrico de eadem, Ricardo de Trillesden.

[D 21] Latin. Undated c.1280. See D/Gr 53 and 67

Charter whereby Peter called Wolleward, de Corneford, confirms to William son of Thomas de Kellawe an acre of meadow in Trillesden, near le Blakelawe, against the west and extending to the rill of Trillesden which acre Elwaldus de Schinktlef formerly held. To have to William and heirs or assigns, freely [etc.]. Warrant clause. Witnesses: Domino Willo. de Latone, Domino Willo. Harpyn, militibus; Thoma de Kellawe, Nicholao et Henrico de eadem, Ricardo de Trillesden. **Elwald of Schinktlef**
Seal: S. Petri Wlardi.

Note the use of the stag's head of the **Ælfwald** sceat/coin minted York ca 800 which to the Dane's symbolizes forest, and the tree on the **Elwald** crest which also symbolizes forest.

Selkirk and Newhall

Shield of Cornelius Elliot of Woollie

Note the shields of Redheugh and Stobs, and how they are quit similar. The family of Stobs which is now of Redheugh, was originally of the Redheugh family before they became of Stobs.

The million dollar question is; *What does that rod, or baton on the shield represent?*

That rod, baton, what is referred to as a *wand*, is an *elwand*.

Elwald, many at times before The Union of The Crowns, were referred to as **Elwand,** or more formally **Elwandis.**

An **elwand** was a length of a Scottish *ell* measure standardized in Endinburgh   a hair more than in Imperial measurements than 37 inches. It is the yardstick the Scots depended upon before the Union. It is the symbol of people known as *elwandis,* which certify measurement of length in a manner of a land surveyor may today. A number of those who carry my Y-DNA, also carry my Y-Chromosomes are guided like I am by numbers. So to you I refer to myself as an *elwandis.* As symbolized on the Redheugh crest, by a drawing of an *ell wand/elwald.*

Though the Gilbert line is of Redheugh, I am not from the Redheugh line.

seal—a bend between two cotises—correspond to those of the Elliots of Redheugh and Lariston, and are quite unlike those of the Elliots of Horseliehill, which differ entirely from the arms of any other Elliot family.⁹ This shows that Gilbert did not belong to the Horseliehill family, and furnishes a further argument in favour of his being descended from the house of Lariston.

The Border Elliots and the Family of Minto
By George Francis Scott Eliot

⑨ The arms of William Elliot of Horseliehill are figured in Armstrong's *History of Liddesdale,* i. 178,—a chevron between two mullets in chief and a stag's head in base.

As one can see as given by; Robert Bruce Armstrong's; *History of Liddesdale,* the Horseliehill family crest is closer to the Kerr of Phernihirst family crest then the Redheugh crest.

Robert P. Elliott (another elwandis), a person in my group which is referred to as the *Daniel Cluster.* Named after people who trace their Y-DNA ancestry to **Daniel Elliot** of the who left testimony for the Salem Witch Trials. For the *Daniel Cluster Modal* one can see the Kerrs rank at the lowest for 570 to likely connection.

In reference to comparing Armstrong's Y-DNA to Elliott's Y-DNA;

However, in the process of attempting to find matches, I used the closest match I could find in the Elliott Border Reiver YDNA database at 12 markers, which was WWX8Y. When I searched for matches at 37 or more markers off by 4 or less, I got 14 matches with about equal numbers of Armstrongs and Elliotts! I have now found Eliotts & Armstrongs which match each other off by a genetic distance of only 1-2 at 67 markers.
This is really quite amazing and it seems to confirm what the tradition in the "Armstrong Chronicals" which says the Elliotts & Armstongs were brothers sons of Fairbairn or the "Fairy Bear". Of course this match hold for only for one cluster of Elliott which is quite distant from the "Daniel Cluster".
Robert P. Elliott 4/13/12

It is felt that the "Daniel Cluster" was cut off from its origins of the York region because of an established Scottish Border of 1320

The seal which Gilbert of Stobs used when he signed the 'Reversion' is attached to that document, and is here represented, together with his signature :—
It will be observed that the seal bears his arms, with the legend 'S. Gilberti Ellot de . . .', the last word being illegible. It is not 'Stobs' or 'Stobbis,' which would not nearly fill the space; but there are traces of some of the letters which give a clue to the decipherment of the name. Two letters in the middle of it are plainly discernible, namely, 'LI,' and these occupy the place they would do if the whole word were 'Horslihill.' Some fainter traces of other letters, which can only be guessed at, fit in with this reading, and no other name can be pointed out which complies with the conditions of the case. Thus there appears little room to doubt that the seal should be read, 'S. Gilberti Ellot de Horslihill.'[1] The arms shown on the
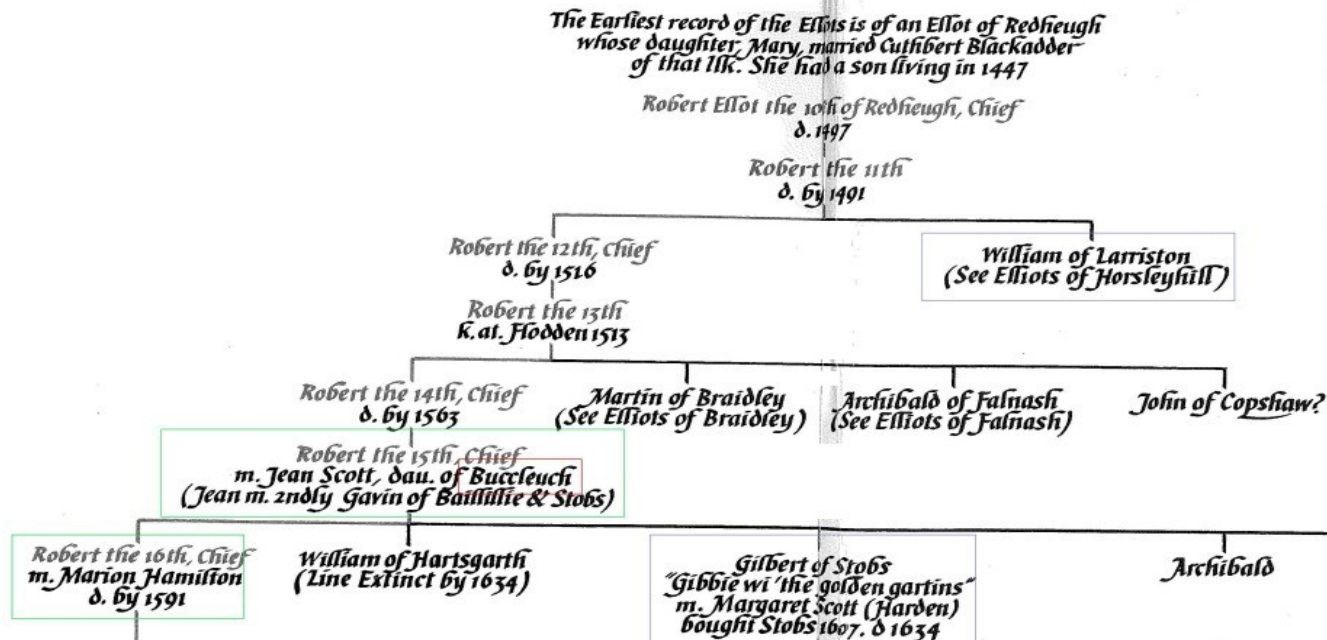

[1] The reading of experts in the Register House, Edinburgh, is HORSLIHYL.

Gilbert is of the Horseliehill family also.

Gilbert is the son of Robert 15th and the daughter of Jean Scott, of

Andrew (Dan) involved in murder Hugh Douglas 1547 father relocated him to Baillillie in 1551 d. by 1563/4

Andrew alias Dandie the Cow, Burgess of Selkirk (bailee)

Robert alias Clementis Hob adopted by uncle Clementis Crosar

Robert   bailee   of John Hamilton estate Armagh, Ulster, Ireland believed to die in Irish Revolt of 1642, had son Robert a surveyor.

Gavin of Baillillie & Stobs m. by 1567 Jean Scott (Widow of Robert the 15th) bought Stobs 1580 Daughters only

Daniel of Tullykelter, a Somerville (Hamilton) Estate, a cualter/catter purchaser for estate.

Andrew Ellot is the brother german (half brother) Robert (Gawenis Hob), and William (Gawenis Will) sons of Gavin Ellot of

Horsleyhill, from his first wife. So Andrew is the brother of Gavin Ellot step father to Gilbert Ellot, of Stobs.

In 1580 we hear of Archie, Gib, and Dandie, sons of Martin's brother.

STOBS. Gawen Elliot of Stobbis is mentioned from 1584 to 1600. He married Jane Scott, and was dead in 1607, leaving three coheiresses —Esther, married Gilbert Ker of Lochtour, and had issue; Dorothy, married George Halyburton of Pinnakill; and (Jean?), married ——— Rutherford, and left a daughter, Jean, who married William Elliot, brother of Robert of Redheuch.

She was dead in 1621, when her son Robert was served heir to her; he d.s.p., and was succeeded by his brother Francis 1642, ancestor of the Elliots of Dunlabyre. The succession of the Stobbs family is not clear; Gilbert was of that place in 1622, and in 1628 purchased Middlesteid, Shaws, &c., from Gilbert Ker and Esther Elliot above named. William of Stobbs, and Gilbert, fiar of Stobbs, figure together 1646-54; Gilbert was knighted, and was direct ancestor of the present baronet.

The Earls of Minto descend from a younger son of Stobbs.

Gawen of Stobbs, in 1592, was tutor to his grandnephew, being preferred to William Elliot, uncle of the boy, till the said William, who was then over twenty-two, should attain the age of twenty-five. A William Elliot represented the burgh of Selkirk in parliament in 1621 and subsequently.

HORSLIEHILL was a separate branch before the middle of the sixteenth century, and from it descends the family of Bewlie and Borthwickbrae, represented by William Elliott-Lockhart of Borthwickbrae and Cleghorn, Esq.

In 1603 William, burgess of Peebles, was served heir of his father, William of Horsliehill; there can hardly be a doubt that he is the William who was Provost of Peebles a few years later, and has been said to be a younger son of Stobs; his great-grandson, Sir John, M.D.,

It should be noted that Gawen the brother to Andrew tutored William Elliot (later Eliott), great uncle to boy. This was likely the oldest son of Gilbert. Where at that time elders in family may have been considered uncles.

Margaret the daughter of Arthur Eliott and grand of Dowager Lady Eliott of Stobs, and I are of Horsliehill, but they are of Redheugh, and I am of Larriston, branch of the Redheugh line. Because it is not a line well search an some Roberts are known in it, plus a William of Gorenberry, the conclusion I made on the line is only temporary, but it is of the line which by the standards of James Lewis Armstrong, of *The Armstrong Chronicles* travels with the Fairy Bear from the forest in or near Saxony, to North Germany/Denmark, onto York then up to Liddel Strength, Kirkandrew, Leven Flu, Canonby region then up the Liddel beyond Mangerton, and South of Branxholme, on The Hill, The Hermitage Hill, then from one border region to another of Fermanagh/Armagh Ulster then departing onto America.

Information again provided by Robert P. Elliott, and one can see that
